OUR CASE STUDY

Skinosis

Skinosis needed a digital space to communicate clinical skincare in a simple, trustworthy way. We built a D2C web experience that educates users on ingredients, routines, and results—while enabling smooth e-commerce interactions. This helped the brand strengthen its medical-grade credibility and drive consumer confidence online.

Peach IQ

Peach IQ focuses on improving productivity for teams and field operations. We engineered a platform that simplifies scheduling, time tracking, and reporting through automation. By turning day-to-day workflows into structured digital processes, Peach IQ delivers measurable efficiency to businesses and distributed teams.

DEFINE DESIGN DEVELOP DEPLOY

OUR CASE STUDY

StarCapital

StarCapital's goal was to provide users with financial clarity and portfolio transparency through mobile. We developed an app that integrates secure user authentication, live portfolio data, and intuitive insights—making investment tracking easier for individuals looking to manage wealth on the go.

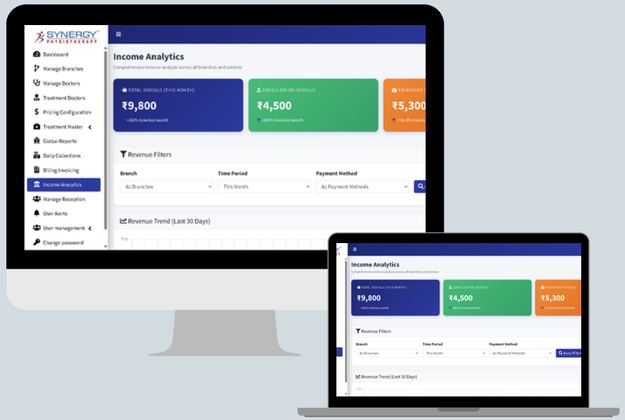

Techsocial

TechSocial wanted to build a space for knowledge-sharing and networking within the tech community. We created a mobile app with interactive content, interest-based feeds, and social features that help users learn, engage, and connect. It serves as a digital community hub for tech discussions and discovery.

DEFINE DESIGN DEVELOP DEPLOY

OUR CASE STUDY

Synergy Physiotherapy

For Synergy Physiotherapy Clinic, we built a professional website that showcases treatments, expertise, and patient care standards. With streamlined navigation and appointment flow, the platform improves clarity and accessibility for patients, helping the clinic enhance online presence and engagement.

Good Greens — Health & Organic Foods

For Good Greens, an organic health foods brand, we crafted a clean, inviting website that highlights products, benefits, and lifestyle values. With user-friendly navigation and clear presentation, the platform helps customers discover offerings easily and supports the brand’s mission of promoting wellness through quality nutrition.

DEFINE DESIGN DEVELOP DEPLOY

OUR CASE STUDY

KlicPic

For KlicPic, we developed a dynamic digital platform that makes photo discovery, sharing, and organization simple and engaging. With intuitive UI, fast navigation, and seamless interaction features, the site enhances user experience and supports vibrant visual engagement for creative communities.

Tippermann

For Tippermann, a leader in heavy equipment and construction services, we designed a professional website that showcases their services, machinery, and project capabilities. With clean navigation and clear service presentation, the platform strengthens brand credibility and helps clients find key information quickly.

AWARDS AND RECOGNITION

Render Infotech is a Clutch-rated and award-winning technology partner for Mobile Apps, Web Platforms, and Digital Product Development.
We are recognized for engineering scalable, user-centric solutions that drive business growth.
